

Onset Fire District – Water Department

Laborer – Full Time

Description

Operate, inspect, and maintain the various components of the water supply, including treatment, and distribution equipment and components. Provide technical input on as well as oversee proposed repair plans to the systems which include wells, water storage tank, distribution pipelines, associated valves, hydrants, cross connection control equipment, and water meters. Conduct all associated vehicle, building and grounds maintenance.

Requirements

To qualify, candidates must have demonstrated the ability to:

- Operate and monitor pumps of various sizes and capacities including deep wells, chemical feed, and sump pumps
- Monitor SCADA equipment, radio communication equipment, manual/electronic flow meters, and similar equipment.
- Identify and troubleshoot malfunctioning system components
- Perform preventive maintenance inspections, and undertake a variety of routine and emergency repairs including underground transmission main breaks
- Maintain utility vehicles, excavation equipment and machines.
- Ability to lift 50 pounds

Required Qualifications -

- Valid driver's license
- High school diploma or GED

Preferred Qualifications –

- Minimum of three years of experience as a System Operator in a water distribution or similar facility
- New England Waterworks Association American Backflow Prevention Association: Certified Cross-Connection Control Surveyor
- *I. Board of Certification of Operators of Drinking Water Supply Facilities*: Distribution Operator Class 1 and Treatment Operator Class 1 licenses

Excellent benefits package includes Blue Cross Blue Shield, and dental insurance, County Pension system, paid vacation, sick and personal time. Salary commensurate with experience and qualifications.
