JOB SUMMARY

Water Distribution: The Water System Maintenance Mechanic performs any and all work as directed or required in the maintenance, repair and/or operation of the water system including, but not limited to, the installation and repair of water services, water gates, water mains, fire hydrants and connections. Performs installations, repairs, maintenance, testing and reading of water meters. Possess the ability to effectively communicate with citizens and water users of the community relative to the water system, water use and water rates. When properly licensed, is required to be on stand-by duty for emergencies, make unscheduled repairs and pump station monitoring. When assuming stand-by status, can make immediate decisions relative to emergencies regarding the water distribution system. Performs any other related work required by the Water Superintendent or his designees.

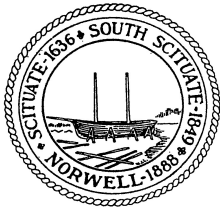

Water Treatment: Ability to monitor equipment and record appropriate parameters relative to the routine operation of water treatment and/or corrosion control facilities. Routinely required to work under the direction of the Superintendent and/or the primary Treatment Plant Operator. Duties may include the following:

- Handling hazardous chemicals under pressure in liquid and gas form.
- Maintenance of high-pressure chemical feed lines pumps and flow meters.
- Maintenance of high-pressure chemical feed lines and flow meters in confined spaces.
- Collection of water quality samples from public drinking wells, treatment points and water distribution system.

When properly licensed, is required to be on stand-by duty for pumping station and treatment facility monitoring. When assuming stand-by status, can make immediate decisions relative to emergencies regarding the water treatment process. These decisions may involve a commonsense approach or may require the assistance of the Water Superintendent and/or the Primary Treatment Plan Operator. Must possess the appropriate license to work on public water systems issued by the Commonwealth of Massachusetts equal to or exceeding that grade in which the Norwell Water Department is currently classified.

DESIRABLE MINIMUM QUALIFICATIONS

Education & Experience: High School Education. Two years of experience in the operation and maintenance of municipal pumping stations and a municipal water distribution system or any equivalent combination of education and experience desirable.
